IIB-DG PROJECT FINANCING PROCEDURE

IIB-DG is responsible for financing development projects in accordance with its strategic and thematic priorities, specifically sustainable infrastructure, cross-border infrastructure, and attracting private sector capital. The following is IIB-DG's procedure for financing development projects:

IIB-DG Official Meetings

- **Shareholders Meeting**

The meeting is held in June of each year. The meeting venue shall be determined by coordination between Members to host the meeting or at the IIB-DG's headquarters.

- **Board of Directors Meeting**

The Board of Directors meets periodically (quarterly) each year at the IIB-DG's headquarters in Washington, or on the sidelines of the annual meeting for the Shareholders.

- **Video Conference Meeting**

Video conference meetings are held for the Board of Directors to discuss various topics related to IIB-DG or to approve selected development projects.

IIB-DG's strategic priorities

Sustainable infrastructure

Promoting green infrastructure and supporting countries in meeting their environmental and development goals

Cross-country connectivity

Prioritising cross-border infrastructure across the world

Private capital mobilisation

Devising innovative solutions that catalyse private capital in collaboration with other governments, private financiers and other partners

IIB tools to fund development projects

Sovereign-backed financing

- A loan to, or guaranteed by:
- A guarantee that covers debt service defaults on a loan that is caused by a government's failure to meet a specific obligation in relation to the project or by a borrower's failure to make a payment under the loan or is accompanied by a member indemnity.

Non-sovereign-backed financing

Any financing extended by IIB-DG that is not a sovereign-backed financing, including any financing to or for the benefit of a private enterprise or a sub-sovereign entity (such as a political or administrative subdivision of a member or a public sector entity) that is not backed by a guarantee or counter-guarantee and indemnity provided by a member to the bank.

Equity investment

The bank may make direct equity investments in private or public sector companies. It may invest either in a new enterprise or an existing enterprise. The investment may take a variety of forms, such as; subscriptions to ordinary shares or preference shares, a loan convertible into equity. IIB-DG's investment may not exceed thirty per cent (30%) of the company's ownership holdings. However, in exceptional circumstances, the Board may decide to approve a higher but not controlling share as well if the bank's investment is in jeopardy, IIB-DG may take control of the company at 70% or above 51% depending on the risk in order to safeguard its investment.

Guarantees

Projects that require guarantees will be evaluated and supervised using the same procedures as the loan process.

Covered securities

IIB considers the issue of covered securities as a complementary platform to enhance the issuer's access to international and local capital markets, expanding its sources of financing. The coverage of shares in companies is considered as exposure to the full amount of coverage and thus subject to the limits set for capital investments.
